**College, muddebihal, Dist Vijayapur**

**PREAMBLE**

The objective of a B.Sc. (Honors) programme in Higher Education system is to prepare its students for the society. The current pattern is designed to provide a focused learning outcome-based syllabus at the Honors level providing structured teaching-learning experiences catering to the needs of the students. The honors courses will prepare the students both academically and in terms of employability. The programme also inculcates various attributes at the Honors level. These attributes encompass values related to emotional stability, social justice, creative and critical thinking, well-being and various skills required for employability, thus preparing students for

continuous learning and sustainability. The new curriculum based on learning outcomes of BSc (Honours) Botany offers knowledge of areas including Plant Systematics, Plant Biotechnology, Resource Botany, Genetics, Ecology, Conservation biology, Physiology and Bioinformatics, Medicinal plants, Plant diseases management etc. The courses define clearly the objectives and the learning outcomes, enabling students to choose the elective subjects broadening their skills in the field of Botany. The course also offers skills to pursue research and teaching in the field of Botany and thus would produce best minds to meet the demands of society. This curriculum framework for the bachelor-level program in Botany is developed keeping in view of the student-centric learning pedagogy, which is entirely outcome-oriented and curiosity-driven. To avoid a rote-learning approach and foster imagination, the curriculum is more leaned towards self-discovery of concepts. The curriculum framework focuses on the pragmatist approach whereby practical application of theoretical concepts is taught with substantial coverage of practical and field works.

### **Aims of Bachelor's degree programme in Botany**

The broad aims of the bachelor's degree programme in Botany are:

1. To provide an environment that ensures the cognitive development of students in a holistic manner. A dialogue about plants and their significance is fostered in this framework, rather than didactic monologues on mere theoretical aspects
2. To provide the latest subject matter, both theoretical as well as practical, such a way to foster their core competency and discovery learning. A botany graduate as envisioned in this framework would be sufficiently competent in the field to undertake further discipline-specific studies, as well as to begin domain-related employment.
3. To mould a responsible citizen who is aware of the most basic domain-independent knowledge, including critical thinking and communication.
4. To enable the graduate to prepare for national as well as international competitive examinations, especially UGC-CSIR NET, and UPSC Civil Services Examination.

### Program Learning Outcomes

The students graduating with the Degree B.Sc. Three years and B. Sc. (Honors) Botany should be able to acquire.

**Core competency:** Students will acquire core competency in the subject Botany, and allied subject areas.

1. The student will be able to identify major groups of plants and compare the characteristics of lower (e.g. algae and fungi) and higher (angiosperms and gymnosperms) plants.
2. Students will be able to use the evidence-based comparative botany approach to explain the evolution of organisms and understand the genetic diversity on the earth. The students will be able to explain various plant processes and functions, metabolism, concepts of gene, genome, and how organism's function is influenced at the cell, tissue, and organ level.

3. Students will be able to understand the adaptation, development, and behavior of different forms of life.
4. The understanding of networked life on earth and tracing the energy pyramids through nutrient flow is expected from the students.
5. Students will be able to demonstrate the experimental techniques and methods of their area of specialization in Botany.

#### **Analytical ability:**

The students will be able to demonstrate the knowledge in understanding research and addressing practical problems.

1. Application of various scientific methods to address different questions by formulating the hypothesis, data collection, and critically analyze the data to decipher the degree to which their scientific work supports their hypothesis.

#### **Critical Thinking and problem-solving ability:**

An increased understanding of fundamental concepts and their applications of scientific principles is expected at the end of this course. Students will become critical thinkers and acquire problem-solving capabilities.

#### **Digitally equipped:**

Students will acquire digital skills and integrate the fundamental concepts with modern tools.

**Ethical and Psychological strengthening:** Students will also strengthen their ethical and moral values and shall be able to deal with psychological weaknesses.

**Team Player:** Students will learn team workmanship in order to serve efficiently institutions, industry, and society.

**Independent Learner:** Apart from the subject-specific skills, generic skills, especially in botany, the program outcome would lead to gain knowledge and skills for further higher studies, competitive examinations, and employment. Learning outcomes-based curriculum would ensure

equal academic standards across the country and a broader picture of their competencies. The Bachelor's program in Botany and Botany honors may be mono-disciplinary or multidisciplinary with following broad objectives.

1. Critically evaluation of ideas and arguments by collecting relevant information about the plants, to recognize the position of the plant in the broad classification and phylogenetic level.
2. Identify problems and independently propose solutions using creative approaches, acquired through interdisciplinary experiences, and a depth and breadth of knowledge/expertise in the field of Plant Identification.
3. Accurately interpretation of collected information and use taxonomical information to evaluate and formulate a position of the plant in taxonomy.
4. Students will be able to apply the scientific method to questions in botany by formulating testable hypotheses, collecting data that address these hypotheses, and analyzing those data to assess the degree to which their scientific work supports theirhypotheses.
5. Students will be able to present scientific hypotheses and data both orally and in writing in the formats that are used by practicingscientists.
6. Students will be able to access the primary literature, identify relevant works for a particular topic, and evaluate the scientific content of theseworks.
7. Students will be able to apply fundamental mathematical tools (statistics, calculus) and physical principles (physics, chemistry) to the analysis of relevant biologicalsituations.
8. Students will be able to identify the major groups of organisms with an emphasis on plants and be able to classify them within a phylogenetic framework. Students will be able to compare and contrast the characteristics of plants, algae, and fungi that differentiate them from each other and other forms oflife.

9. Students will be able to use the evidence of comparative biology to explain how the theory of evolution offers the only scientific explanation for the unity and diversity of life on earth. They will be able to use specific examples to explicate how descent with modification has shaped plant morphology, physiology, and life history.
10. Students will be able to explain the ecological interconnectedness of life on earth by tracing energy and nutrient flow through the environment. They will be able to relate the physical features of the environment to the structure of populations, communities, and ecosystems.
11. Students will be able to demonstrate proficiency in the experimental techniques and methods of analysis appropriate for their area of specialization within biology.

## **B. Sc. Botany Course outcomes under NEP program**

The framework of curriculum for the Bachelor's program in Botany aims to transform the course content and pedagogy to provide a multidisciplinary, student-centric, and outcome-based, holistic education to the next generation of students.

Aside from structuring the curriculum to be more in-depth, focused, and comprehensive with significant skill-set for all exit levels; keeping in mind the job prospects; the emphasis has been to maintain academic coherence and continuum throughout the program of study and help build a strong footing in the subject, thereby ensuring a seamless transition into their careers.

Special attention is given to eliminate redundancy, discourage rote learning, and espouse a problem-solving, critical thinking, and inquisitive mindset among learners.

The curriculum embraces the philosophy that science is best learned through experiential learning, not limited to the confines of a classroom but rather through hands-on training, projects, field studies, industrial visits, and internships.

This updated syllabus, with modern technology, helps students stay informed on the leading-edge developments in plant sciences and promotes curiosity, innovation, and a passion for research, that will serve them well in their journey into scientific adventure and discovery beyond graduation.

The goal is to equip students with holistic knowledge, competencies, professional skills, and a strong positive mindset that they can leverage while navigating the current stiff challenges of the job market.

### **Program Outcomes:**

**By the end of the program the students will be able to:**

(Refer to literature on outcome based education (OBE) for details on Program Outcomes)

**PO1:** Skill development for the proper description using botanical terms, identification, naming and classification of life forms especially plants and microbes.

**PO2:** Acquisition of knowledge on structure, life cycle and life processes that exist among plant and microbial diversity through certain model organism studies.

**PO3:** Understanding of various interactions that exist among plants and microbes; to develop the curiosity on the dynamicity of nature.

**PO4:** Understanding of the major elements of variation that exist in the living world through comparative morphological and anatomical study.

**PO5:** Ability to explain the diversity and evolution based on the empirical evidences in morphology, anatomy, embryology, physiology, biochemistry, molecular biology and life history.

**PO6:** Skill development for the collection, preservation and recording of information after observation and analysis- from simple illustration to molecular database development.

**PO7:** Making aware of the scientific and technological advancements- Information and Communication, Biotechnology and Molecular Biology for further learning and research in all branches of Botany..

**PO8:** Internalization of the concept of conservation and evolution through the channel of spirit of inquiry.

**PO 9:** To enable the graduates to prepare for national as well as international level competitive examinations like UGC-CSIR, UPSC, KPSC etc.

**PO10:** To enable the students for practicing the best teaching pedagogy as a biology teacher including the latest digital modules.

**PO 11:** The graduates should be knowledgeable and competent enough to appropriately deliver on aspects of global importance like climate change, SDGs, green technologies etc at the right opportunity.

**PO 12:** The graduate should be able to demonstrate sufficient proficiency in the hands-on experimental techniques for their area of specialization within biology during research and in the professional career.

## Concept Note, Abbreviation Explanation and Coding:

### Concept Note:

1. **CBCS** is a mode of learning in higher education which facilitates a student to have some freedom in selecting his/her own choices, across various disciplines for completing a UG/PG program.
2. A credit is a unit of study of a fixed duration. For the purpose of computation of workload as per UGC norms the following mechanism is adopted in the University:  
One credit (01) = One Theory Lecture (L) period of one (1) hour.  
One credit (01) = One Tutorial (T) period of one (1) hour.  
One credit (01) = One practical (P) period of two (2) hours.
3. Course: paper/subject associated with AECC, DSC, DSEC, SEC, VBC, OEC, VC, IC and MIL
4. In case of **B.Sc. Once a candidate chose two courses/subjects of a particular two department in the beginning, he/she shall continue the same till the end of the degree, then there is no provision to change the course(s) and Department(s).**
5. A candidate shall choose **one of the Department's courses as major and other Department course as minor in fifth and sixth semester and major course will get continued in higher semester.**
6. Wherever there is a practical there will be no tutorial and vice-versa
7. A major subject is the subject that's the main focus of Core degree/concerned.
8. A minor is a secondary choice of subject that complements core major/ concerned.
9. Vocational course is a course that enables individual to acquire skills set that are required for a particular job.
10. Internship is a designated activity that carries some credits involving more than **25 days** of working in an organization (either in same organization or outside) under the guidance of an identified mentor. Internship shall be an integral part of the curriculum.
11. **OEC: For non- Botany science students. Botany Science students have to opt for OEC from departments other than major and minor disciplines.**

### Abbreviation Explanations:

1. AECC: Ability Enhancement Compulsory Course.
2. DSC: Discipline Specific Core Course.
3. DSEC: Discipline Specific Elective Course.
4. SEC: Skill Enhancement Course.
5. VBC: Value Based Course.
6. OEC: Open/Generic Elective Course
7. VC: Vocational Course.
8. IC: Internship Course
9. L1: Language One
10. L2: MIL
11. L= Lecture; T= Tutorial; P=Practical.
12. MIL= Modern Indian Language; English or Hindi or Telugu or Sanskrit or Urdu

**Program Coding:**

1. Code 21: Year of Implementation
2. Code BSC: BSC Program under the faculty of Applied Science of the University
3. Code 1: First Semester of the Program, (2 to 6 represent higher semesters)
4. Code AE: AECC, (C for DSC, S for SEC, V for VBC and O for OEC)
5. Code 1: First “AECC” Course in semester, similarly in remaining semester for such other courses
6. Code LK: Language Kannada, similarly Language English, Language Hindi, Language Telugu, Language Sanskrit, & Language Urdu
7. Code 1: Course in that semester.
8. Bot: Botany

**ASSESSMENT METHODS****Evaluation Scheme for Internal Assessment:****Theory:**

| <b>Assessment Criteria</b>                                                                                                                                                                          | <b>40 marks</b> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1 <sup>st</sup> Internal Assessment Test for 30 marks 1 hr after 8 weeks and 2 <sup>nd</sup> Internal Assessment Test for 30 marks 1 hr after 15 weeks . Average of two tests should be considered. | 30              |
| Assignment                                                                                                                                                                                          | 10              |
| <b>Total</b>                                                                                                                                                                                        | <b>40</b>       |

| <b>Assessment Criteria</b>                                                                                                                                                                         | <b>25 marks</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1 <sup>st</sup> Internal Assessment Test for 20 marks 1 hr after 8 weeks and 2 <sup>nd</sup> Internal Assessment Test for 20 marks 1 hr after 15 weeks. Average of two tests should be considered. | 20              |
| Assignment                                                                                                                                                                                         | 05              |

| Unit No. | Course Content                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Hours |
| Unit I   | <p><b>Chapter No. 1:</b> Microbial diversity-Introduction to microbial diversity; Hierarchical organization and positions of microbes in the living world. Whittaker's five-kingdom system . Distribution of microbes in soil, air, food and water. Significance of microbial diversity in nature.<br/><b>5 Hours</b></p> <p><b>Chapter No. 2</b> History and developments of microbiology- Microbiologists and their contributions (Leeuwenhoek, Louis Pasteur, Robert Koch, Joseph Lister, Dmitri Iwanowski, Sergius Winogradsky and M W Beijerinck and Paul Ehrlich).<b>3 Hours</b></p> <p><b>Chapter No. 3</b> Microscopy-Working principle and applications of light, dark field, phase contrast and electron microscopes (SEM and TEM). Microbiological stains (acidic, basic and special) and Principles of staining. Simple, Gram's and differential staining.<br/><b>5 Hours</b></p> | 13    |
| Unit II  | <p><b>Chapter No. 4.</b> Culture media for Microbes-Natural and synthetic media, Routine media -basal media, enriched media, selective media, indicator media, transport media, and storage media.<br/><b>3 Hours</b></p> <p><b>Chapter No. 5.</b> Sterilization methods -Principle of disinfection, antiseptic, tyndallisation and Pasteurization, Sterilization-Sterilization by dry heat, moist heat, UV light, ionization radiation, filtration. Chemical methods of sterilization-phenolic compounds, anionic and cationic detergents.<br/><b>5 Hours</b></p> <p><b>Chapter No. 6.</b> Microbial Growth-Microbial growth and measurement. Nutritional types of Microbes- autotrophs and heterotrophs, phototrophs and chemotrophs; lithotrophs and organotrophs.<br/><b>5 Hours</b></p>                                                                                                  | 13    |
| Unit III | <p><b>Chapter No. 7</b> Microbial cultures and preservation-Microbial cultures. Pure culture and axenic cultures, subculturing, Preservation methods-overlaying cultures with mineral oils, lyophilisation. Microbial culture</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 13    |

|                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |    |

| Formative Assessment Marks: 40 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Summative Assessment Marks: 60 |  | Duration of ESA:.02 hrs. |       |
| Course Outcomes                |    | At the end of the course the student should be able to:<br><br>1. To make the students familiar with economic importance of diverse plants that offer resourcesto human life.<br>2. To make the students known about the plants used as-food, medicinal value and also plantsource of different economic value.<br>3. To generate interest amongst the students on plants importance in day today life, conservation,ecosystem and sustainability. |                                |  |                          |       |

|  | <p><b>Practical-1:</b> Study of morphology, classification, reproduction and lifecycle of Nostoc, Oscillatoria.</p> <p><b>Practical-2:</b> Study of morphology, classification, reproduction and life-cycle of Oedogonium &amp; Spirogyra, Ectocarpus and Batrachospermum.</p> <p><b>Practical-3:</b> Study of morphology, classification, reproduction and life-cycle of Riccia &amp; Anthoceros/ Funaria.</p> <p><b>Practical-4:</b> Study of morphology, classification, anatomy, reproduction and life-cycle of Selaginella and Equisetum.</p> <p><b>Practical -5:</b> Study of morphology, classification, anatomy, reproduction and life-cycle of Pteris, Azolla/ Psilotum</p> |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Practical -6:** Study of morphology, classification, anatomy and reproduction in Cycas. Practical -7: Study of morphology, classification & anatomy, reproduction in Pinus. Practical -8: Study of morphology, classification & anatomy, reproduction in Gnetum.

**Practical -9:** Study of important blue green algae causing water blooms in the lakes.

**Practical -10:** Preparation of natural media and cultivation of Azolla in artificial ponds.

**Practical -11:** Study different algal products and fossils impressions and slides.

**Practical-12:** Visit to algal cultivation units/lakes with algal blooms/Fern house/Nurseries/Geology museum/lab to study plant fossils.

(Note: Botanical study tour to a floristic rich area for 1-2 days and submission of study report is compulsory)

### Evaluation Scheme for Lab Examination

| Assessment Criteria            |  | Marks |
|--------------------------------|--|-------|
| Classification and description |  | 10    |
| T.S. of given material         |  | 05    |
| Identification                 |  | 05    |
| Viva Voice /Tour report        |  | 05    |
| Total                          |  | 25    |

### OPEN-ELECTIVE SYLLABUS:

CHOICE BASED CREDIT SYSTEM (CBCS)

## **INTRODUCTION TO THE BA CHOICE BASED CREDIT SYSTEM**

### **(SEMESTER SCHEME)**

B.A Political Science Course is a Choice Based Credit System (Semester Scheme) spread over six semesters. The objective of the course is to provide a firm grounding in the subject, imbibe analytical skills and to develop a realistic and pragmatic perspective on the local, national, regional and international issues that figure in the syllabus.

The syllabus has been updated by offering many new and innovative papers keeping in view the changing times and the societal needs. The titles and detailed contents of the papers are mentioned below. All the Papers in the syllabus are provided with an extensive Reading list.

**The goals and objectives of the B.A Political Science Course are as follows:**

- To impart quality education to those seeking admission to the B.A Political Science course.
- To equip the students to prepare themselves for careers in teaching and research, the Union and State Civil Services, and the non-governmental sector.
- To increase awareness among students on local, national and international issues, and strengthen their analytical skills and capabilities.
- To train students to be good citizens and understand the framework of Indian constitution.

**BA CHOICE BASED CREDIT SYSTEM (SEMESTER SCHEME)**

## QUESTION PAPER PATTERN

### BA CHOICE BASED CREDIT SYSTEM (SEMESTER SCHEME)

W.e.f 2020-2021

Total Marks: 80

Time: 3 hours

**NOTE:** Read Instructions carefully. All parts are compulsory except for their internal options.

#### PART – A

**Instructions:** Answer any **Four** from the following in 100 words each. All questions carry equal marks.

4x5 = 20 marks

- 1)
- 2)
- 3)
- 4)
- 5)
- 6)

#### PART – B

**Instructions:** Answer any **Three** from the following in 300 words each. All questions carry equal marks.

3x10 = 30 marks

- 1)
- 2)
- 3)
- 4)
- 5)

### PART – C

**Instructions:** Answer any **Two** from the following in 500 words each. All questions carry equal marks. **2x15 = 30 marks**

1)

2)

3)

4)

| <b>Assignment &amp; Seminar</b> | <b>05 marks</b>                                |
| <b>TOTAL</b>                    | <b>20 MARKS</b>                                |

**Declaration of Results**

- a) Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the semester end examination. However a candidate should obtain at-least 40% marks in the semester end examination which will be for 80 marks. There are no minimum marks for the Internal Assessment. However after adding the IA marks and the semester end examination marks, the candidates should score a minimum of 40% of the maximum marks per paper. Candidate shall secure a minimum of 50 percent in aggregate in all the papers of a programme in each semester to successfully complete the programme.
- b) The improvement of the performance is permitted as per the rules and regulations of the University.

### Marks and Grade points

| Sl. No | Percentage of Marks           | GPA/CGPA       | Grade |
|--------|-------------------------------|----------------|-------|
| 1      | 75 and above                  | 7.50 to 10.00  | A     |
| 2      | 60 and above but less than 75 | 6.00 to 07.49  | B     |
| 3      | 50 and above but less than 60 | 5.00 to 05.99  | C     |
| 4      | 40 and above but less than 50 | 4.00 to 4.99   | D     |
| 5      | Less than 40.00%              | Less than 4.00 | F     |

### Grading

The Grade Point Average (GPA) shall be given to each candidate based on his/her performance during the semester which includes both the IA and the semester end examination. The GPA of each semester should be carried to next semester as Cumulative Grade Point Average CGPA.

### Grade Points (Format)

Semester GPA = Total Credit Points in all papers

Credit hours

Cumulative Grade Point Average = (GPA of all Semesters)

Credits of All Semesters

## **THIRD SEMESTER**

### **Paper: Political Reporting**

(Skill Enhancement Courses (SEC))

50 MARKS

02 HOURS

#### **Rationale**

This course teaches students the fundamentals of covering political world (between 37 to 60 percent of political news is covered by the media on an average per day) in reporting it professionally. This course is designed to provide a broad overview of the nuances of interpreting the political phenomena starting from the grassroots to the parliament. The idea is to help students develop insights and enlarge their job opportunity by enhancing their skills in a professional manner by giving deeper knowledge of the reporting activity in the age of mass media and new social media. This will thus help students to develop skills of reporting and make it as a career by adding value to their master's degree.

#### **Unit I- Nature of Politics**

1. Meaning and Nature of State, Defining Politics and Measuring Political Developments
2. Defining the role of Mass Media-Press, Radio and TV in India

#### **Unit II- Political Action and Media**

1. Defining Political News, Nature of Political News and Forms of Political News
2. Defining the limits of Political Reporting and working of Lobbies and Pressure Groups

#### **Unit III- Assessment and Political Reporting**

1. Central, State, Local Governments and Judiciary - an assessment of their working
2. Writing Reports - background information, criteria for evaluation (parameters), drawing conclusions

#### **Unit IV- Journalistic Communication**

1. Journalistic writing skills, Dead Lines and Interview Reporting
2. Writing Blogs, Punctuation, and Grammar needs.

**For Undergraduate Program in**  
**POLITICAL SCIENCE**  
**(BA/BSc/BCom/BSW/BBA/BCA and other faculties)**

**w.e.f.**  
**Academic Year 2021-22 and onwards**

## PREAMBLE

Education empowers Mankind. A holistic education paradigm will effectively focus on developing knowledge, employable skill sets, appropriate attitudes and an overall personality. NEP is focused towards imparting such an education system.

India's first education policy of the 21st century is 'National Education Policy 2020' proposes the revision and revamping of all aspects of the education structure, including its regulation and governance. It seeks to create a new system that is aligned with the developmental aspirations & goals of 21st century education, including SDG4, while building upon India's traditions and value systems.

NEP aims for India to have an education system by 2040 that is second to none, with equitable access to the highest-quality education for all learners regardless of social or economic background and seeks to ***“ensure inclusive and equitable quality education and promote lifelong learning opportunities for all” by 2030.***

### **Vision of the National Education Policy 2020**

- ✓ An education system that contributes to an equitable and vibrant knowledge society, by providing high-quality education to all.
- ✓ Develops a deep sense of respect towards the fundamental rights, duties and Constitutional values, bonding with one's country, and a conscious awareness of one's role and responsibilities in a changing world.
- ✓ Instills skills, values, and dispositions that support responsible commitment to human rights, sustainable development and living, and global well-being, thereby reflecting a truly global citizen.

As India is enjoying the demographic dividend, which will last till 2055 and to reap the benefits, a good education policy was the need of the hour. Hence there is lot of hopes on the NEP, which has come as cure the edu-ailments and to plug the shortcomings of the education system which marred for 36 years and strengthen our education system. An expectation on NEP is high. As every good policy success lies in the implementation and active participation of its stake holders, so is the NEP. The success or failure of NEP lies in all our hands. Hence let all of us join our hands in making the NEP successful.

As enshrined in the National Education Policy-2020 vision of introducing course curriculum for undergraduate studies under Choice Based Credit System (CBCS), the main objective of framing this curriculum of BA/B.Sc. (Basic/Hons) in Political Science is to impart the students a holistic understanding of the subject giving substantial weight age to the core contents, skill, value-based and ability enhancement. The syllabus has given due importance on the main streams of the body of knowledge on Political Science” with due recognition of its wide spectrum. The ultimate goal of the syllabus is to enable the students to have an in- depth knowledge on the subject and enhance their scope of employment at every level of exit. Adequate emphasis has been given on the new and emerging techniques and understanding of the subject under the changing regime and global context.

There is a need to strengthen the students to understand essential aspects of political Science in diverse subject areas not only in social sciences, but also among other natural and physical sciences. The curriculum lays focus on creating new knowledge, acquiring new skills and capabilities in Political Science producing an intelligent human resource serving the Political objectives and the society.

## List of Committee Members

### Chairman

**Dr. Harish Ramaswamy**, Vice Chancellor, Raichur University, Raichur.

### Member Convener

**Dr. K. Prasanna Kumar**, Special Officer, Karnataka State Higher Education Council.

### Members

1. **Dr. Muzaffar Hussain Assadi**, Professor, University of Mysore, Mysuru.
2. **Dr. Chandrakant M Yatanoor**, Professor, Gulbarga University, Kalaburgi
3. **Dr. P L Dharma**, Professor, Mangalore University, Konaje
4. **Dr. M. Narasimhamurthy**, Professor, Bangalore University, Bengaluru.
5. **Dr. Ratnakar B M**, Professor, Karnataka University.
6. **Dr. Basavaraj G**, Professor, Tumkur University, Tumakuru
7. **Dr. Kamalakshi Tadasad**, Professor, Rani Channamma University, Belagavi.
8. **Dr. Shanmukhan A**, Professor, Kuvempu University, Shankaraghatta.
9. **Dr. Suresh K C**, Associate Professor, Tumkur University, Tumkuru.
10. **Dr. K C Vidya**, Associate Professor, Maharani Cluster University, Bengaluru.
11. **Shri. Bharatraj**, Associate Professor, GFGC, Channapatna.
12. **Dr. Shivaputra Bedjirge**, Associate Professor, GFGC, Jewargi Colony, Kalaburagi.
13. **Shri. S R Mulla**, Associate Professor, GFGC, Nesargi, Bailhongala Tq.
14. **Shri. H M Krishna**, Associate Professor, Government Arts College, Bengaluru.
15. **Dr. Rabia Begum**, Associate Professor, Govt. Women's First Grade College, Jewargi Colony, Kalaburagi.
16. **Dr. B. Saroja**, Associate Professor, SSA Govt. First Grade College (Autonomous), Ballari,
17. **Dr. S Ananth**, Associate Professor, GFGC, Koppa, Chikamangaluru Dist.
18. **Dr. Basavarajeshwari R Patil**, Assistant Professor, Govt. First Grade College, Kalagahtagi.

## **Program Objectives in Political Science**

- To understand the importance of concepts in Political Science.
- To familiarize the students with the basic ideas thoughts and theories in Political Science.
- To help them to understand and make distinction among Political Theory, Political Philosophy and Political Science and help them to understand the importance of these in the national and global contexts.
- To help them to understand the emergence and growth of modern States and give them an idea of their functioning and relate them to the political realities.
- To equip them to critically relate the theoretical aspects of Political Science to the socio economic and political realities of our times.

## **Program Learning Outcomes in Political Science:**

At the end of the successful completion of the course, the students will be able to-

- Acquire domain knowledge.
- Study and analyze political contexts from critical and constructive prospective.
- Have a better understanding of the working of various political institutions including decentralized institutions state legislatures and parliament and relate this functioning to the greater cause of nation building as a responsible citizen.
- Assess how global national and regional development affects polity and society.
- To gain critical thinking and develop the ability to make logical inferences about socio-economic and political issues, on the basis of comparative and contemporary political discourses in India.
- Contemplate about national and international issues involving States having different political ideologies and historical contexts.
- Pursue higher education such as Post Graduate Studies and Research in Political Science and in other interdisciplinary areas to provide qualitative insights to create a better world.

### 1.5. B - BUSINESS MATHEMATICS - I

**Lecture per Week: 4 hours**

**Max Marks: 80 (End Sem.) + 20 (IA) = 100**

**Exam Duration: 3 Hours**

#### OBJECTIVES:

1. The objectives of the course are to enable students to learn and to have a good working practice of mathematical tools for taking appropriate decisions in managerial situations

| Unit | Topics                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | No of Periods |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| I    | <b>Sets, Relations and Functions:</b> Representation of a Set, Roaster method, Rule method, Types of sets, Operations on sets, Algebra of Sets, Demorgan's Laws, Venn diagrams, Applications of sets to business problems. Ordered pairs, Relation on a set. Relations on a set (Reflexive, Symmetric, Transitive, Equivalence) Functions. Domain, Co-domain range of a function. Types of functions.                                                                                                                    | 10            |
| II   | <b>Theory of Indices and Logarithms:</b> Meaning of $a^0$ , $a^{-n}$ , $a^p/a^q$ . Laws of Indices (without proof) Problems. Laws of Logarithms. Problems on Logarithms. Use of Logarithm tables.                                                                                                                                                                                                                                                                                                                        | 10            |
| III  | <b>Differential Calculus:</b> Definition of derivatives of a function at a point, derivatives of sum, difference, product, quotient of two functions-problems. Differentiation of composite functions- chain rule, implicit functions, parametric functions. Logarithmic differentiation. Successive differentiation. Problems on second order derivatives. Cost function, Revenue function, and Profit function, Break Even Point, Maxima and Minima of functions. Application of differentiation to business problems. | 10            |
| IV   | <b>Ratio and Proportion:</b> Meaning and types of Ratio and Proportion. Direct and Inverse proportion. Problems on these.                                                                                                                                                                                                                                                                                                                                                                                                | 10            |
| V    | <b>Progressions:</b> Arithmetic Progression, Geometric Progression. Definition – nth term sum to first 'n' terms of an Arithmetic Progression and Geometric Progression. Problems based on these and application.                                                                                                                                                                                                                                                                                                        | 10            |

### 1.8 . SPECIAL ACCOUNTS PAPER - I

(Compulsory for Non - Commerce students Joining B.Com)

Lecture per Week: 4 hours

Max Marks: 80 (End Sem.) + 20 (IA) = 100

Exam Duration: 3 Hours

#### Objectives:

1. To make the students acquire the conceptual knowledge of accounting
2. To equip the students with the knowledge of accounting process and preparation of final accounts
3. To develop the skills of recording financial transactions and preparation of reports using computers.

| Unit | Topics                                                                                                                                                                                                                                                                                                                      | No of Periods |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| I    | <b>Introduction:</b> Origin of Accounting Meaning of book keeping, Accounting, Accountancy, Distinction between Book-keeping and Accounting, & Accounting and Accountancy. Need, Objectives and Advantages of Accounting, Basic Terms. Accounting Principles, Concepts, Conventions, Accounting Cycle. Accounting Equations | 10            |
| II   | <b>Double Entry System of Book Keeping:</b> Meaning, Advantages Classification of Accounts -English System: American System: Rules of debit and credit under English System and American System                                                                                                                             | 10            |
| III  | <b>Journal:</b> Meaning Features Objectives and Advantages. Proforma of Journal, Journalizing and Journal Entry. Simple and Compound Entries. Ledger : Meaning, Features, Need and Importance of Ledger , Distinction between Journal and Ledger Format of Ledger, Ledger Posting, Balancing of Ledger Accounts             | 10            |
| IV   | <b>Subsidiary Books:</b> Meaning, Features - Advantages. Purchases Book. Sales Book, Purchases Returns Book, Sales Returns Book, Bills Receivable Book, Bills Payable Book, Cash Book, Journal Proper, Invoice, Trade Discount and Cash Discount, Debit Note, Credit Note.                                                  | 10            |

|   |                                                                                                                                                                                                                                                                     |    |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| V | <b>Cash Book:</b> Meaning, features, Objectives, Simple Cash Book. Two column Cash Book ,Three column Cash Book, Contra Entries, Cash book with discount and bank columns, Petty cash book: Meaning, features Objectives and Advantages Analytical & imprest system | 10 |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|

#### **SUGGESTED REFERENCE:**

1. Text Book of Accountancy – B S Raman
2. Principles of Accountancy – Tulsian
3. Introduction to Accountancy - T S Grewal
4. Accountancy – Dr. R. V. Diwan

#### **Guidelines:**

1. These papers are for first and Second semesters students seeking admission to B.Com from Non – Commerce background
2. The examination for Special Commerce and Special Accountancy papers will be conducted by the respective colleges along with internal test of other subjects.
3. There will not be University examination for Special Commerce and Special Accountancy
4. The attendance and passing of these papers is compulsory.

### 1.9 . SPECIAL COMMERCE - I

**Lecture per Week: 4 hours**

**Max Marks: 80 (End Sem.) + 20 (IA) = 100**

**Exam Duration: 3 Hours**

#### **OBJECTIVES:**

1. To familiarize Non - Commerce students who join Commerce stream with the basics of Commerce so that they adjust to the new stream they have chosen.
2. To make them know about different forms of business organizations as they are frequently referred in First semester classes.
3. To ensure that they know at least the minimum about cheques, etc

| <b>Unit</b> | <b>Topics</b>                                                                                              | <b>No of Periods</b> |
|-------------|------------------------------------------------------------------------------------------------------------|----------------------|
| I           | <b>Concept of Commerce</b> : Meaning of trade and Commerce, Branches of Commerce, Significance of Commerce | 10                   |
| II          | Sole trading, Partnership Firms, types of partners, advantages and disadvantages, Limited partnership      | 10                   |
| III         | <b>Joint Stock Companies</b> – features, types of companies, types of shares                               | 10                   |
| IV          | <b>Cooperative Societies</b> : meaning, features, types, advantages and disadvantages                      | 10                   |
| V           | <b>Negotiable Instruments</b> - Bill of Exchange, Promissory note, Cheque.                                 | 10                   |

#### **SUGGESTED REFERENCE:**

1. Text book of Business Studies – as per PU syllabus

#### **Guidelines:**

1. These papers are for first and Second semesters for students seeking admission to B.Com from Non – Commerce background
2. The examination for Special Commerce and Special Accountancy papers will be conducted by the respective colleges along with internal test of other subjects.
3. There will not be University examination for Special Commerce and Special Accountancy
4. The attendance and passing of these papers is compulsory.

B.Sc VI SEMESTER ZOOLOGY PAPER - I  
2018-2019  
INDIVIDUAL SYLLABUS FOR THE ACADEMIC YEAR-2018-2019

APPLIED ZOOLOGY (optional)  
PROF: L.R.DINDALKOPPA

**Sericulture :** Mulberry Silkworm and Life History of *Bombyx mori* 07 hrs  
Rearing of Silkworm: Grainage management, Emergence of moth and fertilization, egg laying, hatching and moulting of silkworm, spinning of cocoons, Cocoon processing, stifling and spinning silk. Filature. Non mulberry silkworm, types. In brief & Silkworm diseases- Muscardine, Grassorio, Flacherio & Pebrine.

**Apiculture:** Species of Honey Bees, their Social organization, Life History 05 hrs  
Methods of Bee Keeping, products of Bees, & their Economic importance

**Insect Pest Management :** Natural control and Applied control of pests 05 hrs  
Applied Control — Mechanical, Physical, Cultural, Legal, Chemical control

**Vermiculture:** Earthworm species used in vermiculture, vermiculture technique, and importance of vermiculture. 04 hrs

**Aquaculture :** 10 hrs  
Prawn Fisheries, Species of Prawns, Culture of freshwater and marine Prawns, Preservation and processing of Prawns.

**Pearl Culture :** Pearl producing molluscs, Pearl formation, Pearl producing sites in India. Quality and composition of Pearl.

Pearl Industry: Artificial Insertion of nucleus  
Brief technique of Fish culture, Preservation of fishes and their Byproducts

**Poultry :** Breeds of fowl, Diseases of poultry, Poultry maintenance and By-products, and Composition and Nutritive value of Egg. 06 hrs

**Animal Husbandary:** Maintenance, Breeds Diseases, Products and Byproducts of the following 10 hrs

Sheep and Goats, Cow and Buffalos, Composition and Nutritive value of Milk

**Lac culture:** Classification of Lac insect (*Tectaria lacca*), Life history of Lac insect. Host plants, Cultivation of Lac. Composition and properties &

College, Bailhongal

Scanned with CamScanner

B.Sc V Semester Zoology Paper I (optional)  
2018-19 onwards  
Ecology, Evolution, Paleontology, Zoogeography, Wild life conservation

Individual Syllabus for the Academic Year 2018-19

Prof: L.R. Dindalkoppa

**The Solar System**

Origin of Earth, Origin of Life and its theories  
The geological time scale

03hrs  
03hrs

Fossils: Definition and Kinds of fossils, How fossils are formed, Methods of Preservation.  
Connecting links and Living fossils. The importance of fossils

02hrs

**Theories of Organic Evolution :**

Lamarckism, Darwinism, Mutation Theory

And the Modern Synthesis Theory; (population gene Pool, Gene Frequency, Variations — gene mutation, chromosomal mutation; Isolation and recombination. Genetic drift, Hardy-Weinberg equilibrium)

06hrs

Modes of Evolution : Microevolution, Macroevolution and  
Mega-evolution.

02 hrs

Evolution of Man and Horse

04 hrs

**Paleontology**

Mesozoic reptiles with a note on Dinosaurs.

Zoogeography: Zoogeographical realms of world, A brief account of Wallace's line

03 hrs

**Wildlife Conservation :**

Wild life conservation methods

Wildlife in India, Causes for the depletion of wildlife.

Wild Life Conservation Techniques, methods and measures

Brief account of; IUCN, WWF, Bombay Natural History Society,

Indian Board for Wild Life, Red Data Book.

Wild Life Act 1972 and its amendments in India, CITES.

Project Tiger and Biosphere Reserve.

09hrs

B.Sc I SEMESTER ZOOLOGY 2018-2019

INDIVIDUAL SYLLABUS FOR THE ACADEMIC YEAR-2018-2019

PROF: Miss PREETI.A.ANGADI

## Biology of Non-chordates

### UNIT-II

**Platyhelminthes:** General characters & Classification up to class 3 hrs with examples. Type Study-Fasciola hepatica  
Externals character, Reproductive system & Life history. Parasitic adaptation in Platyhelminthes.

**Aschelminthes:** General characters & classification up to class 2 hrs with examples. Parasitic adaptations in Aschelminthes.

### UNIT-V

**Parasitology:** External structure, Life Cycle, and mode of Transmission, Pathogenicity and control measure of the following. 07hrs

1. Plasmodium vivax
2. Entamoeba histolytica
3. Taenia solium
4. Ascaris
5. Wuchereria bancrofti
6. Ectoparasites – Ticks & mites.

(Academic year-2018-19)  
**B.Sc. SEMESTER - II BOTANY (optional)**  
**PAPER: II PLANT PHYSIOLOGY AND BIOCHEMISTRY.**  
Teaching hours: 50

| Name Of The Faculty      | Unit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Total Hrs. |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Prof. Sunita B. Pujer.   | <b>UNIT-I : WATER RELATIONS:</b> Solutions, suspensions & colloids, true solutions, percentage, molarity, molar, buffer, molal solutions, pH, colloids, emulsion, and gels. Permeability, diffusion, imbibition, osmosis: embranes, endosmosis, exosmosis, osmotic pressure, turgor pressure (TP), wall pressure (WP), relation between OP, DPD & TP, concept of water potential, plasmolysis, deplasmolysis, significance of osmosis & imbibition. Importance and sources of water, Active and Passive water absorption. Mechanism of ascent of sap: root pressure theory and cohesion tension (Dixon & Jolly) theory. Transpiration: types, mechanism, theories of opening & closing of stomata, factors affecting rate of transpirations, antitranspirants and guttation. Mineral nutrition: macro and micronutrients and their role & deficiency symptoms. | 10 Hrs     |
| Prof.(Smt.)Asha S. Patil | <b>UNIT-II : PHOTOSYNTHESIS:</b> Photosynthetic pigments, action spectrum, concept of two photosystems: Red drop & Emerson enhancement effect, photo phosphorylation, Calvin cycle, C4 & CAM path way, photorespiration and factors affecting photosynthesis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |            |
| Prof.(Smt.)Asha S. Patil | <b>UNIT-III : NITROGEN FIXATION:</b> Importance of nitrate reductase, its regulation and ammonium assimilation. Growth: Photomorphogenesis: photoperiodism, phytochrome, vernalization & concept of biological clock, seed dormancy:- causes and methods of breaking dormancy. Stress physiology:- concept and plant responses to water, salt and temperature stresses. Growth regulators: physiological roles of Auxins, Gibberellins, Cytokinins, ABA, Ethylene & growth inhibitors.                                                                                                                                                                                                                                                                                                                                                                         | 10 Hours   |
| Prof.(Smt.)Asha S. Patil | <b>RESPIRATION:</b> aerobic, anaerobic & fermentation, glycolysis, Kreb's cycle, electron transport system, redox potential, oxidative phosphorylation, pentose phosphate pathway. Respiratory quotient (RQ) and factor affecting respiration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 10 Hrs     |
| Dr. Laxman B. Kadam:     | <b>UNIT-IV : THERMODYNAMICS:</b> Principles, free energy, energy rich bonds phosphoryl group transfer and ATP.<br><b>ENZYMES:</b> Classification, nomenclature (IUBMB) and properties; co-factors and coenzymes, isozymes, mechanism of enzyme action, enzyme inhibition, enzyme kinetics (Michaelis-Menten equation).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 4 Hrs.     |

**MONTH WISE SPLIT UP OF THE SYLLABUS 2019-2020**

Name of Faculty : Dr. KUMAR NAIK K.JL.

Class: HSE II Semester

**DECEMBER: 2019**

**Aromatic Hydrocarbons**

Resonance in benzene, Aromaticity-Huckel's  $4n + 2$  rule with respect to benzene, furan, pyridine and [10] annulene

**JANUARY: 2020**

Mechanism of electrophilic aromatic substitution-halogenation, nitration, sulphonation and Friedel-Craft's reaction (evidences for two step mechanism and evidences for formation of electrophile).

**FEBRUARY: 2020**

Poly nuclear hydrocarbons: Classification, examples, constitution of naphthalene, Haworth synthesis, nitration and sulphonation of naphthalene.

**Colloids**

Emulsions: Types of emulsions, Preparation and emulsifiers

**MARCH: 2020**

Gels: Classification, preparation and properties, general applications of colloids.

**Solids**

Space lattice, unit cell, crystal systems, calculation of particles per unit cell

**APRIL: 2020**

laws of crystallography, x-ray diffraction of crystals, derivation of Bragg's equation, Miller indices, determination of structure of NaCl by rotating single crystal method.

# SPLIT OF SYLLABUS 2020-21

First Semester B.Sc. (Botany) Paper Code: BOTDSCT1.1  
 Paper Title: Biodiversity (Microbes, Algae, Fungi and Archegoniate) Teaching Hours: 4  
 Hrs / Week Marks: Th-80+IA-20 Total hours: 60 Credits:

| name Of The Faculty         | Unit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Total Hrs. |

| Prof. Chetan M. Unashikatti | Unit1: Viruses : Discovery, general structure, replication (general account), DNA virus (T-phage); Lytic and lysogenic cycle, RNA virus (TMV); Economic importance; Bacteria: Discovery, General characteristics and cell structure; Reproduction - vegetative, asexual and recombination (conjugation, transformation and transduction); Economic importance. Viral Plant Diseases: TMV. Vein clearing, Dwarfing, Yellowing and BBTV disease. Bacterial Plant Disease: Citrus canker, Bacterial blight and Crown gall disease.                                                                                                                                                                                                                                                                                                                                                                                                                                        | 15 hours   |
| Prof. Sunita B. Pujer.      | Unit2: Algae: General characteristics; Ecology and distribution; Range of thallus organization and reproduction; Classification of algae by Smith; Morphology and life-cycles of the following: Nostoc, Oedogonium, Vaucheria, Volvox, Ectocarpus & Batrachospermum. Economic importance of algae. Fungi: Introduction-General characteristics, ecology and significance, range of thallus organization, cell wall composition, nutrition, reproduction and classification; True Fungi General characteristics, ecology and significance, life cycle of Rhizopus (Zygomycota), Penicillium (Ascomycota), cercospora (Deuteromycota), Puccinia, Agaricus (Basidiomycota); Fungal Diseases: Late blight of potato, White rust of Albugo candida, Black rust of Puccinia, Powdery mildew and Early Blight of Tomato. Symbiotic Associations-Lichens: General account, reproduction and significance; Mycorrhiza: ectomycorrhiza and endomycorrhiza and their significance | 15 hrs.    |
| Mr. Laxman B. Kadam         | Unit 3: Introduction to Archegoniate: Unifying features of archegoniates, Transition to land habit, Alternation of generations. Bryophytes: General characteristics, adaptations to land habit, Classification, Range of thallus organization. Classification (up to family), morphology, anatomy and reproduction of Riccia, Marchantia, Anthoceros and Funaria (Developmental details not to be included). Ecology and economic importance of bryophytes with special mention of Sphagnum.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 15 hrs     |
| Prof. (Smt.) Asha S. Atil   | Unit 4: Pteridophytes: General characteristics, classification, Early land plants (Lepidodendron, Lepidocarpon, Calamites). Classification (up family), morphology, anatomy and reproduction of Selaginella, Equisetum and Pteris. (Developmental details not to be included). Heterospory and seed habit, stelar evolution. Ecological and economical importance of Pteridophytes. Gymnosperms: General characteristics, classification. Classification (up to family), morphology, anatomy and reproduction of Cycas, Gnetum and Pinus. (Developmental details not to be included). Ecological and economical importance.                                                                                                                                                                                                                                                                                                                                            | 15 hrs     |

| Prof.Maruthi.N.S | Unit III<br>Elasticity: Definition of Stress-strain, Hooke's law. Types of elastic constants. modulus of elasticity and derivation of expression for relation between elastic constants. Poisson's ratio. expression for Poisson's ratio in terms of elastic constants. Work done in stretching and twisting wire. Theory of torsional pendulum, determination of rigidity modulus and time period. Bending moments. Theory of cantilever. Determination of Youngs modulus by bending of beam supported at its ends and loaded at middle. Problems 13                                                                                                                                                                                                                                                                              | 15 |
| Prof.Goutami.N.B | Unit II<br>Gravitation: Newton's law of Gravitation (statement). Expressions for escape velocity and orbital velocity. Kepler's laws of planetary motion. Derivation for Kepler's 2nd and 3rd law. Concept of Satellite, derivation for binding energy of satellite. Artificial Satellite: Geostationary satellite and polar orbit satellite with different types of orbits (qualitative). Concept of weightlessness. Basic ideas of G.P.S. and NAVIC. Problems<br>Rigid Body Dynamics: Moment of Inertia. Radius of Gyration. Statements of theorem of parallel axis and theorem of perpendicular axis. Derivation of expressions for moment of inertia for (i) rectangular lamina (ii) thin uniform rod and (iii) circular disc. Theory of compound pendulum and bar pendulum. Theory of flywheel and its applications. Problems | 15 |
| Prof.Sunita.S.P  | Unit I<br>Conservation Laws: Law of conservation of linear momentum. Centre of mass and expression for position vector, velocity, acceleration and force of centre of mass. Distinction between laboratory frame of reference and centre of mass frame of reference. Concept of elastic collision and inelastic                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 30 |

## DEPARTMENT OF MATHEMATICS

Month Wise Teaching Plan of Prof. N. K. Enagi for the year 2021-22

Class: B.Sc. I Semester (DSC)

| Month    | Portion to be Covered                                                                                                                                                                                                                    |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| October  | Matrix: Recapitulation of Symmetric and Skew Symmetric matrices.                                                                                                                                                                         |
| November | Algebra of Matrices, Row and column reduction to Echelon form. Rank of a matrix.                                                                                                                                                         |
| December | Inverse of a matrix by elementary operations; Solution of system of linear equations; Criteria for existence of non-trivial solutions of homogeneous system of linear equations. Solution of non-homogeneous system of linear equations. |
| January  | Eigen values and Eigen vectors of square matrices, real symmetric matrices and their properties,                                                                                                                                         |
| February | Cayley-Hamilton theorem, inverse of matrices by Cayley-Hamilton theorem (Without Proof). reduction of such matrices to diagonal form,                                                                                                    |

Class: B.Sc. I Semester (OEC)

| Month    | Portion to be Covered                                                                                                                                                                                                                    |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| October  | Matrix: Recapitulation of Symmetric and Skew Symmetric matrices.                                                                                                                                                                         |
| November | Algebra of Matrices, Row and column reduction to Echelon form. Rank of a matrix.                                                                                                                                                         |
| December | Inverse of a matrix by elementary operations; Solution of system of linear equations; Criteria for existence of non-trivial solutions of homogeneous system of linear equations. Solution of non-homogeneous system of linear equations. |
| January  | Eigen values and Eigen vectors of square matrices, real symmetric matrices and their properties,                                                                                                                                         |
| February | Cayley-Hamilton theorem, inverse of matrices by Cayley-Hamilton theorem (Without Proof). reduction of such matrices to diagonal form,                                                                                                    |

Month Wise Teaching Plan for the year 2021-22

Class: B.Sc. III Semester (DSC)

| Month    | Portion to be Covered                                                                                                                                                                                                                                             |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| October  | <u>PAPER-I: MATHEMATICAL LOGIC &amp; REAL ANALYSIS</u><br><u>UNIT-I: Real Analysis-I:</u> Jacobians, Properties and examples, Lagrange's mean value theorem for functions of two variables. Taylor's (only statement) and Maclaurin's theorems for two variables. |
| November | Maxima and Minima of two and three variables, Necessary and sufficient condition for extreme values of two variables.                                                                                                                                             |
| December | <u>UNIT-II: Sequences-I:</u> Sequences. Limit of a sequences, Bounded and unbounded sequences, Convergent, Divergent, and Oscillatory sequences. Algebra of convergent sequences. Monotonic sequences. Theorems on monotonic sequences.                           |
| January  | <u>UNIT-III: Sequences-II:</u> Cauchy's sequences, Cauchy's first and second theorems on limits. Cauchy's criterion for convergence of sequences                                                                                                                  |
| February | Sub sequences. (Definition & example). Revision and Exam paper review, Revision of previous year questions                                                                                                                                                        |

### DEPARTMENT OF MATHEMATICS

#### EVEN SEMESTERS

Month Wise Teaching Plan of Prof. N.K.Enagi for the year 2021-22

Class: B.Sc. II Semester (DSC)

| Month  | Portion to be Covered                                                                                                                                                         |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| May    | Course Title: Algebra - II and Calculus -II<br><u>UNIT-III: Partial Derivatives:</u> Functions of two or more variables-explicit and implicit functions, partial derivatives. |
| June   | Homogeneous functions- Euler's theorem, total derivatives, differentiation of implicit and composite functions,                                                               |
| July   | Jacobians and standard properties and illustrative examples.                                                                                                                  |
| August | Taylor's and Maclaurin's series for functions of two variables, Maxima-Minima of functions of two variables<br>Revision of previous year questions                            |

Month Wise Teaching Plan of Prof(Miss) S.S.Gulannavar for the year 2021-22

Class: B.Sc. III Semester (DSC)

| Month    | Portion to be Covered                                                      |
|----------|----------------------------------------------------------------------------|
| October  | <b>Group Theory-I:</b> Groups, Abelian group, Standard examples of groups, |
| November | Properties of groups, Semi groups, Subgroups and its properties,           |
| December | Permutation group. Cyclic groups & its properties,                         |
| January  | Cosets. Lagrange's theorem, Euler's theorem                                |
| February | Fermet's theorem. Revision of previous year questions                      |

Month Wise Teaching Plan of Prof(Miss) S.S.Gulannavar for the year 2021-22

Class: B.Sc. III Semester (SEC)

| Month    | Portion to be Covered                                                                                                                                                               |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| October  | <b>Unit-II THEORY OF EQUATIONS</b><br>Polynomial equation of nth degree in one variable, Euclidean algorithm,                                                                       |
| November | Reminder Theorem, Factor Theorem, Fundamental Theorem of Algebra,                                                                                                                   |
| December | Relation between the roots and coefficient of general polynomial equation in one variable,<br>Synthetic division.                                                                   |
| January  | If one of the root of an equation $a_0x^n + a_1x^{n-1} + \dots + a_n$ has one of its rational root is $p/q$ , then p is an exact divisor of an and q is an exact divisor of $a_0$ . |
| February | Solution of cubic and Bi- quadratic equations.                                                                                                                                      |

Sub: BOS Meeting on 19<sup>th</sup> March 2018.

Sir/Madam,

The Eighth meeting of the members of the Board of Studies in the subject KANNADA is convened on 19<sup>th</sup> March 2018 in the Department of KANNADA at 10:30 a.m. During the meeting, syllabi for First and Second Semester in KANNADA will be redesigned.

Your participation and valuable suggestions will definitely result in better syllabi.

I request you to kindly make it convenient to attend the meeting.

TA/DA will be paid as per the norms.

Thank you,

  
Chairman

Sub: Off-line BoS Meeting on 14<sup>th</sup> June 2022.

Sir/Madam,

The Fourteenth meeting of the members of the Board of Studies in the subject Computer Science is convened on 14<sup>th</sup> June 2022 in the Department of Computer Science at 11:00 am. During the meeting, CBCS Syllabi for B.Sc.V and VI Semester in 2022-2023 will be designed.

For your convenience and perusal, draft syllabus is mailed. Please go through the same.

Your participation and valuable suggestions will definitely result in better syllabi.

I request you to kindly make it convenient to attend the meeting.

Thank you.
